

Shabi Levanda

Quality & Release Engineering Leader
AI & Agentic Systems Builder

shabi231@gmail.com
linkedin.com/in/shabi-levanda
github.com/ShabiLev

Senior Quality & Release Engineering leader with more than two decades in high-tech and 10+ years leading software quality teams. Combines QA strategy, Agile delivery, automation, data analysis and hands-on technical investigation across mobile, web and enterprise systems.

Build fast. Verify independently. Release with evidence.

SELECTED IMPACT

20+ YEARS IN HIGH-TECH	10+ YEARS QA LEADERSHIP
20% DEVELOPMENT-CYCLE REDUCTION	40–50% DEFECT / DATA-ERROR REDUCTION

RECENT LEADERSHIP EXPERIENCE

Quality Assurance Manager · Cello (formerly Cellopark) Mobility and road-management platform - Introduced Agile practices and led sprint planning to strengthen delivery cadence and team visibility. - Led development of a Python-based mobile automation framework and remained hands-on in UI, API and investigation work. - Improved Support-to-QA bug-reporting workflows and cross-functional issue communication. - Used SQL analysis and debugging to investigate system behavior; worked with MongoDB data where required. - Mentored a remote QA engineer and coached the team in root-cause analysis and stronger defect investigation. Environment: Jira, Xray, Confluence, Postman, Python, SQL, MongoDB, mobile automation.	2024–Present
Quality Assurance Manager · Terminal X Large-scale e-commerce product - Managed and mentored distributed QA and webmaster teams across web, mobile, backend and data-quality delivery. - Defined Agile and Jira workflows, reducing development-cycle time by 20%. - Reduced software defects and data errors by 40–50% through stronger coverage and quality processes. - Raised test-planning, documentation and release-validation standards while maintaining a 20% hands-on testing approach. - Improved internal site-management workflows and cross-team delivery collaboration. Environment: Jira, Xray, Confluence, Postman, SQL, Magento 2, Python, web and mobile UI/UX testing.	2021–2023

Shabi Levanda

Engineering leadership grounded in evidence

EARLIER EXPERIENCE

Quality Assurance Manager · Cellebrite

2013–2021

- Built and led a team of six QA testers across release quality, full-SDLC testing and new-device integration.
- Led risk mitigation, root-cause analysis, stakeholder reporting and quality under a zero-return-bug policy.
- Acted as Scrum Master and led Agile implementation across R&D.
- Introduced mobile automation and maintained a 30%+ hands-on QA approach.

System Engineer · Elbit Systems

2001–2013

- Developed, tested and maintained avionics systems and custom test equipment.
- Produced specifications and STD, STP and STR engineering documentation.
- Coordinated requirements and engineering activities with global clients.
- Conducted environmental testing and trained personnel to strengthen system readiness.

SELECTED ENGINEERING PROJECTS

FlowProof
Evidence-driven AI release assurance connecting risk, checks, independent review and deterministic release decisions.
[View public repository](#)

CWL Office
Private-source, read-only multi-tenant operations workspace with dynamic discovery and guarded queries. Public-safe case study available in the portfolio.

Agentic Engineering Platform
Reference architecture for governed AI-assisted engineering, specialist roles, evaluation, evidence and release gates.
[View public repository](#)

AI & AGENTIC ENGINEERING

Designed governed AI-assisted engineering operating models combining prompt contracts, explicit scoped context, Conductor-led specialist workflows, layered evaluation, independent verification and evidence-based release gates. Builds reusable structured prompts for implementation, QA, investigation and release work without treating AI output as completion evidence.

TECHNOLOGY & TOOLS

QA strategy & leadership	Release governance
Agile & Scrum	Risk management
Jira, Xray & Confluence	STD / STP / STR
Python & Selenium	Playwright & Appium
REST APIs & Postman	SQL & MongoDB
CI/CD & GitHub Actions	JavaScript & HTML/CSS

PROFESSIONAL DEVELOPMENT

Python Automation Full-Stack
QA Experts College

Selenium WebDriver, REST APIs, CI/CD, HTML, JavaScript and file handling.

LANGUAGES & SERVICE

Hebrew — Native
English — Advanced
Volunteering — Police Patrol Officer
